Sign up in Google Earth Engine (GEE)

Google Earth Engine (GEE) is a powerful web-platform for cloud-based processing of remote sensing data on large scales. It brings together the world's satellite imagery from multiple sources – Landsat, Sentinel, MODIS etc. along with access to other secondary climatic and Geo-physical datasets covering entire globe.

https://earthengine.google.com/

To perform data processing in GEE platform, **we need to sign up which is free**. However there could be **substantial** delay in approvals from the Google.
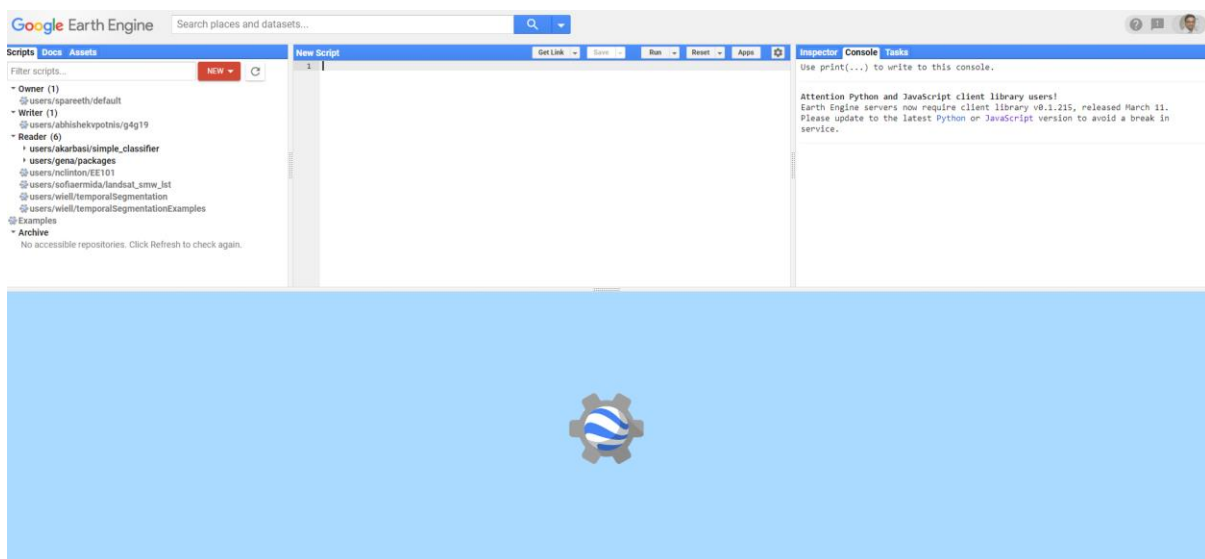

To sign up, go to https://signup.earthengine.google.com

There are **two ways** to signup:

1) Use your **Gmail** id and fill up the application form in the above link
2) Use **your student/professional email id** (………@un-ihe.org) to create a Google account and use that account to sign up the GEE by filling the application form.
   To create google account using an existing email id follow instructions in this link - https://support.google.com/accounts/answer/27441?hl=en under the heading "**Use an existing email address**".

After submitting the application, you will receive an email (almost immediately or in couple of days) with the outcome. After you get approval, check this link https://code.earthengine.google.com/ to see if you have access to the GEE code editor or not. **It will look like the below screenshot after signing in.**

Tips: While filling the application form please note to **fill your full name, the full name of your organization** (**i.e. no abbreviations**), and **a detailed description** of what you would like to accomplish with Earth Engine, to avoid rejections.
